Contents Volume 221 (2000)

5TH INTERNATIONAL SYMPOSIUM ON INORGANIC NITROGEN ASSIMILATION

3rd Fohs Biostress Symposium

Guest editor: M.A. Martins-Loução
Departamento de Biologia Vegetal, Faculdade de Ciencias de Lisboa, Campo Grande, Bloco C2 Piso 4, 1700 Lisboa, Portugal

Differences in nitrate and ammonium uptake between Scots pine and European larch
M. Malagoli, A. Dal Canal, S. Quaggiotti, P. Pegoraro and A. Bottacin **1–3**

Effect of enriched rhizosphere carbon dioxide on nitrate and ammonium uptake in hydroponically grown tomato plants
C.A. van der Merwe and M.D. Cramer **5–11**

Effects of rhizospheric bicarbonate on net nitrate uptake and partitioning between the main nitrate utilising processes in *Populus canescens* and *Sambucus nigra*
W. Wanek and M. Popp **13–24**

Influx, efflux and net uptake of nitrate in *Quercus suber* seedlings
C. Mata, N. van Vemde, D.T. Clarkson, M.A. Martins-Loução and H. Lambers **25–32**

The nitrate reductase promoter of birch directs differential reporter gene expression in tissues of transgenic tobacco
W. Hachtel and T. Strater **33–38**

Glutamine synthetase isoforms in *Trientalis europaea*: a biochemical and molecular approach
G. Parry, J. Woodall, S. Nuotio and J. Pearson **39–45**

Expression of the bacterial *gdhA* gene encoding a NADPH glutamate dehydrogenase in tobacco affects plant growth and development
R. Ameziane, K. Bernhard and D. Lightfoot **47–57**

Glutamate synthase from *Chlamydomonas reinhardtii*: interaction studies with its substrate ferredoxin and molecular cloning
M.I. García-Sánchez, C. Gotor, J.-P. Jacquot and J.M. Vega **59–65**

Modulation of amino acid metabolism in transformed tobacco plants deficient in Fd-GOGAT
S. Ferrario-Méry, A. Suzuki, C.Kunz, M.H. Valadier, Y. Roux, B. Hirel and C.H. Foyer **67–79**

Manipulating the pathway of ammonia assimilation through genetic engineering and breeding: consequences to plant physiology and plant development
J. Harrison, N. Brugière, B. Phillipson, S. Ferrario-Mery, T. Becker, A. Limami and B. Hirel **81–93**

Physiological regulation of plant-atmosphere ammonia exchange
J.K. Schjoerring, S. Husted, G. Mäck, K. Høier Nielsen, J. Finnemann and M. Mattsson **95–102**

Intracellular measurement of ammonium in *Chara corallina* using ion-selective microelectrodes
D.M. Wells and A.J. Miller **103–106**

Contribution of N_2 fixing cyanobacteria to rice production: availability of nitrogen from ^{15}N-labelled cyanobacteria and ammonium sulphate to rice
E. Fernández Valiente, A. Ucha, A. Quesada, F. Leganés and R. Carreres **107–112**

Volume 221 No. 2

Soil types with different texture affects development of Rhizoctonia root rot of wheat seedlings
J.S. Gill, K. Sivasithamparam and K.R.J. Smettem **113–120**

Soil potassium mobility and uptake by corn under differential soil moisture regimes
Q. Zeng and P.H. Brown **121–134**

Copper uptake and translocation in chicory (*Cichorium intybus* L. cv Grasslands Puna) and tomato (*Lycopersicon esculentum* Mill. cv Rondy) plants grown in NFT system. I. Copper uptake and distribution in plants
M.T. Liao, M.J. Hedley, D.J. Woolley, R.R Brooks and M.A. Nichols **135–142**

Effect of five tree crops and a cover crop in multi-strata agroforestry at two fertilization levels on soil fertility and soil solution chemistry in central Amazonia
G. Schroth, W.G. Teixeira, R. Seixas, L. Ferreira da Silva, M. Schaller, J.L.V. Macêdo and W. Zech **143–156**

Mycorrhizae formation and nutrient uptake of new corn (*Zea mays* L.) hybrids with extreme canopy and leaf architecture as influenced by soil N and P levels
A. Liu, C. Hamel, R.I. Hamilton and D.L. Smith **157–166**

A study of the impacts of Zn and Cu on two rhizobial species in soils of a long-term field experiment
A.M. Chaudri, C.M.G. Allain, V.L. Barbosa-Jefferson, F.A. Nicholson, B.J. Chambers and S.P. McGrath **167–179**

Phosphate transport by hyphae of field communities of arbuscular mycorrhizal fungi at two levels of P fertilization
I. Thingstrup, H. Kahiluoto and I. Jakobsen **181–187**

Traits associated with improved P-uptake efficiency in CIMMYT's semidwarf spring bread wheat grown on an acid Andisol in Mexico
G.G.B. Manske, J.I. Ortiz-Monasterio, M. Van Ginkel, R.M. González, S. Rajaram, E. Molina and P.L.G. Vlek **189–204**

In situ annual nitrogen mineralization predicted by simple soil properties and short-period field incubation
A.P. Schaffers **205–219**

Nitrate uptake kinetics for rooted cuttings of _Acer rubrum_ L.
J.M. Kelly, W.R. Graves and A. Aiello **221–230**

Effect of provenance on free amino acid and chemical composition of Scots pine needles
H. Raitio and T. Sarjala **231–238**

The influence of crop management on the water balance of lupin and wheat crops on a layered soil in a Mediterranean climate
J. Eastham and P.J. Gregory **239–251**

Wetting and drying cycles in the maize rhizosphere under controlled conditions. Mechanics of the root-adhering soil
S. Czarnes, A.R. Dexter and F. Bartoli **253–271**

Soil respiration fluxes measured along a hydrological gradient in a Norway spruce stand in south Sweden (Skogaby)
A.I. Gärdenäs **273–280**

Interactions between perennial ryegrass (_Lolium perenne_ L.) and white clover (_Trifolium repens_ L.) under contrasting nitrogen availability: productivity, seasonal patterns of species composition, N_2 fixation, N transfer and N recovery
A. Elgersma, H. Schlepers and M. Nassiri **281–299**

Volume Contents **301–303**

Author index **305**
